

CAI Training on “How to manage atrophic cases with vertical and horizontal GBR (Guided Bone Regeneration)?”

Speaker: Prof. Silvio Meloni

Date: Friday January 26, 2018

Venue: Novotel Al Barsha, Dubai, UAE

Dear Participant,

Welcome to the CAI training on **How to manage atrophic cases with vertical and horizontal GBR (Guided Bone Regeneration)?**.

This training is going to make you discover new techniques and new tools. For this you need to use a certain number of selected instruments.

1. To actively participate to this training ANPA MEDICAL SUPPLIES DMCC is offering the following components for free to each participant:

- One acrylic model with soft tissue.
- One Collagen Membrane.
- One vial of Bone particles.
- 3 Tacks to stabilise the membrane.
- Bone Safescraper curves to share.
- One AxisGuide license for one month to analyse the bone surface before the surgery.
- Suture material.
- Swan Morton Blades #15.

2. Prof. Silvio Meloni advises the participants to come with their own instruments based on his list:

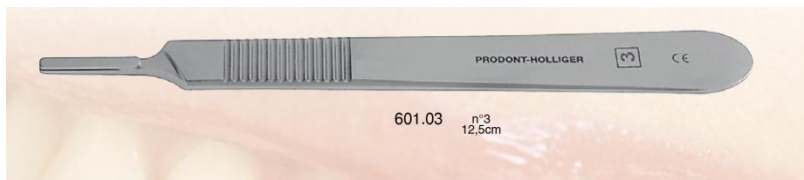

1. Serrated amalgam.

2. Micro CK6.

3. Blade Holder.

4. Molt Periosteal Elevator.

5. Scissors 9cm curved.

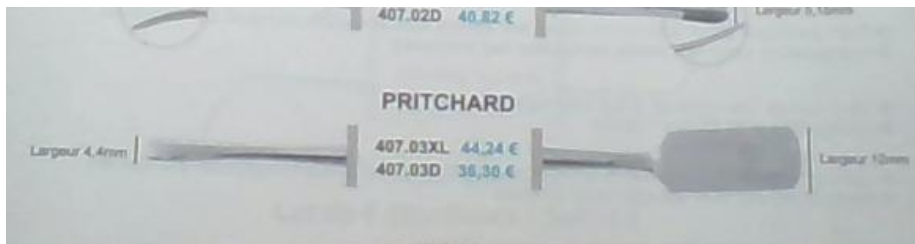

6. Metal cup.

7. Needle holder.

8. Pritchard elevator.

If you don't have all these instruments, feel free to contact Arshad Alam Khan
arshad@anpamedical.com or Call: +971 50 50 35 996.

Thanking You
Looking forward to seeing you at the venue.
