Mobile number: 00971 50 659 2616

Title of the training: **Digital Management  
of Infection Control and Medical Data**

Duration of the training: **One day**

## ABSTRACT OF THE TRAINING

**Dr. Philippe Tardieu** will introduce the medico legal obligations we have to respect in a medical practice and issues we are facing without using the right tools to manage them. He will propose multiple solutions to handle a successful medical practice.

## LECTURE AIM AND ABSTRACT

All clinics are facing the same issues related to infection control, tracking laboratory orders, tracking monthly payments to laboratories, items

orders, traceability, inventory, real time evaluation of the inventory, expire dates management, price of same items sold by different distributors, medico-legal constraints, consumption evaluation of Items by practitioner or by period, export of payment details to accountancy, tracking sterilization, lab orders digital management, etc.

The aim of this training is to define the needs specific to medical practices, and also to analyze the solutions to get an answer to these problems. This training concerns all practitioners and personnel working in any kind of medical practices.
